- Multitasking
- Problem Solving and Decision Making Skills

Achievements

- Dean Lister, 2024 - 2025
- College Graduate, 2025

Winfreid Jullian M. Palacio

Career Objective:

As a fresh graduate in computer science, I am seeking an opportunity to begin my professional journey in your company environment that values learning, collaboration, and adaptability. I am eager to apply my academic knowledge to real-world challenges, contribute to team objectives, and gain hands-on experience by working closely with others in a practical setting.

While my background is rooted in computer science, I am also open to other opportunities in different roles that emphasize problem-solving, adaptability, and continuous learning. I am eager to support projects, learn from experienced professionals, and grow alongside a team while developing practical skills that will support a strong and sustainable career.

Projects

Website Portfolio:

- Design a personal portfolio website showcasing your projects, skills, and experience.

App Design Application:

- Create mockups and prototypes for mobile applications with user-friendly interfaces like Figma.

FoodSnap - Web Application (Thesis):

- The goal of this project is to develop a food image analyzer that, is based on the dish that the user chooses to upload. That will analyze the food image and then present the ingredient list and a step-by-step making. Providing a straightforward and user-friendly website where users can get what they need without having to go through several websites or videos, assists beginners who are attempting to learn how to cook.

Professional Skills

Design Thinking:

- Being able to come up with new ideas for the design of the website and Figma.

Teamwork:

- Ability to work well in a team, exchange knowledge and ideas, and help the group achieve its goals.

Adaptability:

- Willingness to learn new things, technologies and adapt to changing environments and requirements in the rapidly evolving field of technology.

Punctual:

- Ability to effectively manage time, prioritize work, and meet deadlines in order to complete the task assigned to me.

Certificates

TOEIC Certificate:

- Offered by De La Salle University-Dasmariñas as a part of their English proficiency preparation for global opportunities.

Network Basics:

- Offered by De La Salle University-Dasmariñas through the Cisco Networking Academy program.

Introduction to Cybersecurity:

- Offered by De La Salle University-Dasmariñas through the Cisco Networking Academy program.

On-the-Job Training (OJT) - Larga International Logistics Inc.:

- Gains hands-on experience creating websites using HTML, CSS, and JavaScript.
